

Product Datasheet

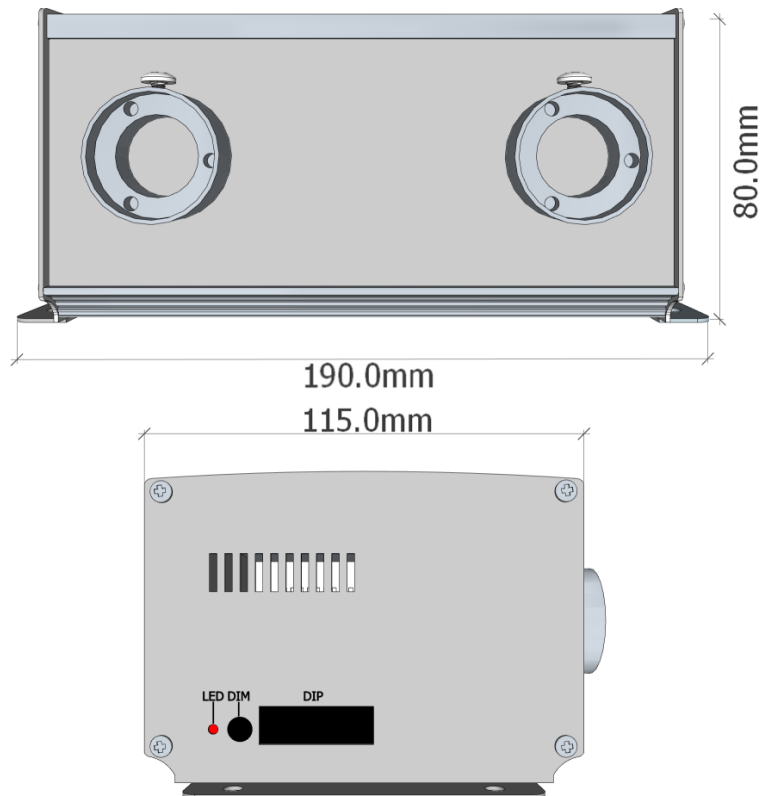

MiniLED650

The MiniLED650 is an efficient LED fibre optic dimmable twinport light source with twinkle effect. The light source can be controlled either by the supplied radio remote, or via a DMX connection, allowing the MiniLED650 to integrate with most home automation systems.

The compact remote allows the user to stop/start the twinkle or colour changing effects, increase/decrease the LED brightness level or set the unit to standby.

DMX control unlocks the full potential of this light source, with control of the twinkle wheel, dimming and strobing effects.

Using the Starscape Infinity system, the MiniLED650 has a capacity of 1200 mixed diameter star points.

Optical port size (ID)	20mm
Supported fibre types	PMMA / Glass
Supply voltage	240ac via transformer 3 pin plug
PSU output	12v DC
Power consumption	14w
LED (power & colour temperature)	2x 5w (Cool white)
Operating temperature range	-10°C / +40°C
Operating environment	Dry, ventilated.
Control options	Radio remote control (315mhz), DMX
Effects range	White light twinkle, 8 bit dimming (DMX)
Dimensions	190 x 115 x 80mm
Weight	895gr
LED Lifespan	50,000 hours (nominal)
Material & colour	Steel – grey, Aluminium - silver
Country of manufacture	China (ISO9001 accredited)
