## MaxiLED40

The MaxiLED40 is an efficient LED fibre optic dimmable light source featuring colour changing and twinkle effects. The light source can be controlled either by the supplied radio remote, or via a DMX connection, allowing the MaxiLED40 to integrate with most home automation systems.

The compact remote allows the user to stop/start the twinkle or colour changing effects, increase/decrease the LED brightness level or set the unit to standby. A series of preset programs enables the user to easily access a variety of mixed effects from the remote.

Using the Starscape Infinity system, the MaxiLED40 has a capacity of 1500 mixed diameter star points.

Optical port size (ID)	34mm
Supported fibre types	PMMA / Glass
Supply voltage	240ac via 3 pin plug
Power consumption	43 watts
LED (power & colour temperature)	40w (Cool white)
Operating temperature range	-10°C / +40°C
Operating environment	Dry, ventilated.
Control options	Radio remote control (315mhz), DMX
Effects range	White light, twinkle, 6 colour wheel, 8 bit dimming (DMX)
Dimensions	270 x 264 x 135 mm
Weight	5.6kg
LED Lifespan	50,000 hours (nominal)
Material & colour	Steel – black, Aluminium - silver
Country of manufacture	China (ISO9001 accredited)
